

Onderzoeken stapelen zich enkel op over de schadelijke effecten op de gezondheid. We weten inmiddels ook dat overheden en bedrijven rommelen met onderzoekscijfers en resultaten om vooral maar achter het geld aan te rennen. Wist u bijvoorbeeld dat is vastgelegd dat straling de hersenen maximaal 1 graad in temperatuur mag verhogen? Maar dat er geen enkel onderzoek is wat dat op lange termijn doet. Ik wil dat alle straling wordt teruggedraaid en er eerst degelijk en onafhankelijk onderzoek gedaan wordt naar de effecten op de gezondheid. Op de gezondheidsbeurs staat het ministerie van volks"gezond"heid wel met een standje te verkondigen dat straling geen effect heeft en volkomen veilig is. Hoe kan dat?

In de meeste gevallen is alles allang van te voren bepaald en mogen de "ham"burgers pas op het allerlaatste moment stukken inzien waar al jaren werk aan vooraf gegaan is. Dit noemen we dan met een schijnheilig gebaar democratie. Geheimzinnig doen, documenten wegstoppen, cijfers verdraaien, achter gesloten deuren overleggen is per definitie geen democratie.

Ik wil graag per onderzoek / bron een antwoord of reactie waarom de overheid en bedrijven vinden dat straling volkomen veilig is.
