In brief

Since the constitutional reform of 10/10/10, by which the islands of Bonaire, Sint Eustatius and Saba became part of the Dutch constitutional system as public entities, the European Netherlands and the public entities have worked hard to improve administrative and financial relations. The basis for administrative and financial relations is set out in the Public Entities Bonaire, Sint Eustatius and Saba Act (hereinafter: WolBES) and the Public Entities Bonaire, Sint Eustatius and Saba Finances Act (hereinafter: FinBES). In view of the experience gained, the proposed amendment to these laws aims to further improve inter-administrative relations between the European Netherlands and the public entities.

This purpose of this bill is to strengthen and improve inter-administrative relations between the Caribbean public entities Bonaire, Sint Eustatius and Saba and the European Netherlands. In addition, the systems for administrative and financial supervision will be updated. The most important amendments to WolBES relate to the discontinuation of the position of kingdom representative, the increase in the number of island council members and executive council members and the modernisation of inter-administrative supervision.

FinBES relates among other things to the public entities' budget and financial management, their power to raise taxes and their financial relationship with the European Netherlands. In addition, FinBES regulates the financial supervision and the tasks and powers in this context of the supervisory authority (the Minister of BZK), the Bonaire, Sint Eustatius and Saba Board of Financial Supervision and the island administration with regard to finances. Financial supervision is used where improvement is considered desirable.

Who it is important for

All citizens of the Caribbean Netherlands.

- At the local elections, citizens will notice in due course that the number of island council members has been increased. The proposed increase in the number of island council members and the number of island commissioners will strengthen administrative power and local democracy. It will also ensure wider, more varied political input from the population.
- Most of the changes are administrative matters that only indirectly affect the majority of citizens.
- Nevertheless, everyone is invited to respond to the open Internet consultation. The explanatory memorandum to the bill and the IAK (Integral Assessment Framework) form are available in English and Papiamentu as well as Dutch.

What this law will change

A number of proposals have been made to improve administrative and financial relations. There are plans to increase the number of island council members and governing council members. This will strengthen local democracy. In addition, the position of the Government Representative is being discontinued. Some of the associated duties will be transferred to the lieutenant governor. The amendments also seek to make supervising the performance of the islands' tasks simpler and more flexible.

The legislative amendments will help ensure a better functioning and more effective government and less bureaucracy, which will benefit the inhabitants of the Caribbean Netherlands.

Practical examples

The main proposals are:

- The scrapping of the position of kingdom representative;
- The establishment of differentiated inter-administrative supervision models;
- The increase in the number of island council members and island commissioners;

- The establishment of differentiated supervision models for financial management and the budget.
